# Island Electronics Security & Monitoring Ltd

# GPS ANYPLACE

Tiny, accurate, discreet, and reliable. The next generation of GPS tracking is here!

The GPS WalkAbout is one of the smallest, lightest GPS/GSM/GPRS trackers in the world. Although the GPS WalkAbout is as small as a set of car keys, it is feature rich, and may be used in almost any tracking application.

The GPS WalkAbout includes a built-in microphone which can be remotely enabled and dialed up from any phone.

GPS personal tracking is the ability for any person to locate another person, object or thing with the use of a device that receives information from the GPS satellite network in space. All real-time personal GPS tracking systems include some sort of transmitter - that ultimately sends this data back to the end user.

The most popular mode of transmitting the data back using GPRS through a cellular telephone company provider.

## FEATURES

- One of the smallest GPS personal trackers in the world
- Dimensions: L=2.5" W=1.75" H=1"
- SOS button for emergency use
- Built-in microphone with "listen-in live" feature
- Geofence feature sends alert if target exits or enters predefined area
- Enhanced sensitivity for indoor and outdoor reporting
- Remotely programmable auto report intervals
- No external antenna needed, just plug and play
- On-board Flash memory for 'store and forward' data logging
- Tri-band GSM 850/1800/1900 MHz for worldwide coverage
- SiRF Star III high performance, low power consumption chipset
- Easy-to-use web based tracking portal

*only*  
**\$65** per month\*  
 Airtime & monitoring.  
 (Device cost-\$399)  
 \* billed quarterly in advance

## APPLICATIONS

- Personal Tracking GPS – For emergencies
- Teenager Tracking and Driver Safety
- Tracking the Elderly
- Personnel Tracking
- Fleet Management
- Equipment Tracking – Construction Sites
- Marine Tracking – Yachts, Boats, Waverunners

### Teenage Driver Tracking Safety

Parents can benefit greatly using GPS for their teenage driver tracking. GPS enables them to monitor teenage driving information as speeds driven, addresses of stops and starts, and location and direction at any time.

Geofences and curfews can be set; an email can be sent notifying the parent where and when a violation occurred. These factors contribute to teenage driver safety on the road and parental peace of mind.

### GPS Personal Tracking

When we mention the words GPS personal tracking what comes to mind? A virtual safety net for those adventurous souls who set out to explore the wild? The helpless feeling of a parent who has lost track of their child in a crowd? A worried spouse who fears what the worst every time their partner is late in coming home? An employer who just wants to know if the people they are paying to do a job are actually getting the job done? Whatever your needs may be there is a personal GPS tracker designed specifically to fit them.

Peace of Mind is everywhere. Sound the alarm, locate and communicate. Anytime, anywhere. These devices have been proven time and again to save lives. A gps personal tracker keeps you on the map, even in situations where cell phones don't work. Whether you are permitting someone to track your progress, merely checking in or calling for help, gps personal tracking gives you a vital line of communication or emergency aid where you need it and when you want it.
